## EDUCATION

### Boston University | Boston, MA

B.A. in Computer Science | GPA: 3.6/4.0

September 2021 – May 2025

- **Honor:** Dean's List (Four Semesters)
- **Relevant Courses:** Software Engineering, MEAN Stack Application Development, Mobile App Development, Fundamentals of Computing Systems, Applied Machine Learning, Foundations of Data Science, Introduction to Database Systems, Theory of Computation, Analysis of Algorithms, Computer Systems, Combinatoric Structures, Data Science for Goods, Probability in Computing, Data Science in R, Modern Regression Analysis in R, Linear Algebra

## TECHNICAL SKILLS

**Programming Languages:** Java (Advanced), Python (Advanced), R (Advanced), JavaScript (Advanced), HTML (Advanced), SQL (Advanced), Kotlin (Intermediate), C (Intermediate), C# (Intermediate)

**Familiar with:** Next.js, React, Node.js, Jetpack Compose, ASP.NET, Vue3, noSQL, SqlSugar, MongoDB, DBMS, XML

## PROJECTS

### Full-stack Android App Development | School Project | Team Leader

Dec 2024

- Designed a responsibly designed full-stack Android App for English vocabulary learning using latest Jetpack Compose
- Used Moshi and Retrofit with Coroutines to handle API integrations, and used Firebase for authentication
- Implemented Room with cloud synchronization for real-time updates of studying progress across device
- Built UI with Material 3, multi-screen flows, LiveData, and ViewModel
- App tested, including Unit test, UI test, and Error Logging

### Impact Analysis | Client Based Project | Team Leader

May 2024

- Client: Mayor's Office of Returning Citizens, City of Boston
- Developed a comprehensive web dashboard analyzing the impact of the office of returning citizens (ORC) in FY22-24
- As a leader, led weekly meetings, client meetings, data analysis, dashboard backend development, database schema
- Utilized technologies: Python, JavaScript, MongoDB, React, Trello, Slack
- Analyzed the statistical impact from the performance of ORC, and helped generate interactive graphs for their annual report

### Spotify Library-Based Web Application | School Project | Team Leader

Dec 2023

- Collaborated with a team of 4 and developed a fully functional web application with a dynamic JavaScript-based front-end, an Express.js based back-end, a MongoDB database that stores back-end application state
- Coded most of the backend & API integration & database interactions

### Statistics Team Project | School Project | Team Leader

Dec 2022

- Topic: "Comparative Analysis on Apartment's Average Rent Price in Four Different Neighborhoods near BU"
- Organized team members for different jobs such as hypotheses establishing, data collection, data analysis
- Analyzed cross-sectional data with variables room size, year built, bed types, days on markets, crime rate, and average income to understand their influences on rent price
- Found significant positive relationships between year built, bed types, room size and rent price

## RESEARCH EXPERIENCE

### Analysis of Machine Learning Techs | CIEI | Nanjing, China

July 2023

- Conducted cooperative research analyzing the performances of CNN, ANN, GRU, LSTM, ARIMA, and Transformer models in forecasting stock prices
- Contributed to findings that indicated LSTM outperformed other algorithms
- Produced a paper "Comparative Analysis of Different Machine Learning Techniques in Forecasting Stock Price"

## PROFESSIONAL EXPERIENCE

### Software Developer (Internship) | Shanpang (Suzhou) Technology Co., Ltd. | Suzhou, China

Jun 2024 - Aug 2024

- Contributed to the development of an online diagnosis and treatment system for a Biotech Company
- Optimized database architecture using SQL Sugar ORM that reduced query time by 30% and enhanced system performance
- Improved patient appointment scheduling module using ASP.NET and Vue3, which led to 20% increase in user engagement
- Designed UI in patient registration page based on Vue3, with focus on design improvement, accessibility, and load speed
- Gained knowledge in enterprise-level system design, website UI improvements, axios-based browser and node.js connection

### Client Services & Support | BU IT Help Center IS&T | Boston, MA

Sept 2023 - May 2024

- Provided technical support to students and staff, handled the delivery of devices around the campus, helped with troubleshooting hardware and software issues during deliveries
- Developed problem-solving skills and improved communication of technical information

### Mentor | Bridge to BU Program | Boston, MA

Sept 2021 - Dec 2022

- Supported international students' adjustment to BU through English practice, cultural discussions, and team activities
- Enhanced communication and leadership skills by guiding mentees in academic development
